In today's world, doing 'work as before' is an organisation's passport to death.

“The musk deer searches far and wide for the source of its scent without realizing that it comes from within itself.”

Leadership Development Retreat is the order of the day. Soft skills, Management skills and Professional skills are the contemporary passwords to effective leadership. While multinationals and the corporate world queue up for the MBA professionals, the Church has to do with the available leaders and managers within her rank. Such a limited availability of personnel needs to be countered with greater professionalism and less good will mechanisms. Leadership Development Retreat for priests & Religious is a DBI response offered to Church, so that *“the person who serves God may be fully qualified and equipped to do every kind of good deed” (2 Tim: 3,17)*
